If your machine is giving you a "Cycle Timeout" message soon after the "start" button is pressed then you will need to do a "Factory Reset" (Steps A, B, and C)

If the cycle times out about 2 minutes after you start the cycle then all you need to do is increase the cycle watchdog timer. (Steps A and C)

Factory Reset procedure:

- A. Enter password:
- 1. Press the menu button one time
- 2. Arrow down to go to "Password"
- 3. Arrow right to go into Password screen
- 4. Press MODE button to highlight the asterisks
- 5. Press the Menu button 4 times to enter 1111
- 6. Press enter (you should see ABC in the lower left)
- B. Factory Reset:
- 1. Enter password if not already done
- 2. From the Main Menu navigate up or down to Service/Debugging
- 3. Arrow right to go into service/debugging menu
- 4. Arrow down to Factory Reset
- 5. Arrow right to go into Factory Reset
- 6. Press Mode button to highlight OFF
- 7. Arrow up to change from off to on
- 8. Press enter (on will change back to off)
- C. Reset Cycle Watchdog Timer:
- 1. Enter password if not already done
- 2. From the Main Menu navigate up or down to Advanced Parameters
- 3. Arrow right into Advanced parameter
- 4. Arrow down to Timers
- 5. Arrow right into Timers
- 6. Arrow down to Cycle Watchdog Timer
- 7. Press Mode button twice to highlight the value
- 8. Arrow up/down to set value to (300)
- 9. Press enter to set the value

Note:

.

If you had to do a "Facoty Reset" ALL of the setting of the machine will be reset, including the number of wraps, carriage speed, top/bottom wrap first, ETC.

You will need to change these settings individually to conform to the wrap style your product requires.
